

Activating Your MAAT License

After you have been issued a Product Key, that 25 digit mix of capital letters and numbers that you received after purchase, you are ready to activate your license.

1) In your favorite web browser, head to:

<http://lc.codemeter.com/83343/depot/>

There, you will find a “Welcome to the MAAT Inc. License Portal” web page. The License Portal allows you to create and store a license for your MAAT product.

The screenshot shows the MAAT Inc. License Portal activation page. At the top left is the MAAT logo. To the right are links for 'Home' and 'Auto Update', and a language dropdown menu set to 'English'. The main heading is 'Welcome to the MAAT Inc. License Portal'. Below this is a white box containing the text: 'Welcome to MAAT's License Portal. You can transfer your licenses to a virtual container using this License Portal. Please enter your product key and click "Next".' Underneath is a 'Product Key:' label followed by a text input field. Below the input field is an orange 'Next' button. The footer contains '© WIBU-SYSTEMS AG' and a 'Legal Notice' link.

2) Copy and paste or type in your Product Key into the Product Key field. Note that the hyphens after each 5 character block of letters and numbers are part of the Product Key and are required.

Once you have entered your Product Key, click on the orange Next button.

3) In the resulting My Licenses page, you will see a list of the MAAT products that are associated with your Product Key. In this example, DRMeter is listed.

Check that all the information is correct, then click the orange Activate Licenses button.

4) In the resulting Available Licenses - Select Storage Method page, the two large blue rectangles at bottom are buttons. They allow you to choose the storage location of your license.

The button on the left allows you to store your license on a hardware dongle, specifically a 3-Series Wibu CodeMeter dongle. The button on the right allows you to store your license on your host computer instead.

Mousing over either button highlights that button to show you it is an active, clickable area.

In this example, the right button is shown with an orange rectangle surrounding it. This is the button typically used, and the one we will use for this tutorial. Before you continue, please read all the information on this page, then decide which storage method you will use. Then, click on the large blue button at right.

Available Licenses - Select the storage method for Your Licenses

You can bind or store your Wibu licenses either in a single computer, as a file-based license, or in a 3-Series CodeMeter dongle. 3-Series dongles are Wibu dongles whose serial number starts with the number 3. Older dongles will not work.

- When binding to a computer, licenses are transferred to that specific machine. Be advised: file-based licenses are associated with particular properties of that computer so, if changes are made to the computer during upgrades or repairs, the license may not continue to work.
- When binding to a CodeMeter dongle, the licenses are transferred to that dongle. This allows your licenses to be portable, and easily moved among different computers.

Note that licenses can be transferred back to this License Portal and later re-deployed to another computer or dongle.

I want my licenses in a CodeMeter dongle to be able to share them on different computers.
Firm Code: 6000240

I want my licenses on one computer.
Firm Code: 6000240 | CmContainer: MAAT Inc. Soft Activation (2001)

5) In the resulting Available Licenses, your MAAT product is listed and, below that, a Select Container menu to choose the license container.

Available Licenses

To activate your licenses:

1. Select the license you want to activate.
2. Then, select the virtual container to which you want to transfer the license.
3. Click "Activate Selected Licenses Now".

<input checked="" type="checkbox"/>	Name	Activated On	CmContainer	Status
<input checked="" type="checkbox"/>	MAAT Dynamic Range Offline Meter (Buy)			Available

Select Container

 [Activate Selected Licenses Now](#)

Offline license transfer

[Select storage](#)[My Licenses](#)

The License Portal automatically generates a “soft” or file-based container for you so, review the information and then click the orange Activate Selected Licenses Now button.

6) Clicking the orange Activate Selected Licenses Now button will result in a web service progress page...

The screenshot shows the 'Available Licenses' page with a modal dialog box titled 'Online License Transfer'. The dialog box contains a yellow warning icon and the following text: 'Please wait! The selected licenses are transferred. This process may take several minutes to complete. Please do not remove the Container or dongle during this process and do not reload this page.' Below the text is a progress bar with a blue segment. At the bottom of the dialog, the text reads: 'Starting license transfer.', 'Creating license request.', and 'Downloading license update.' The background page is dimmed, showing the 'Activate Selected Licenses Now' button and the 'Offline license transfer' text.

Once the creation of your container and storage of your license is

complete, the web service will return the following page:

7) This page signals that your license is ready to be used! Thanks for your purchase of our products, and we hope you have fun engineering with MAAT!
